

PRICE UPDATES AND CHANGES FOR 2000

University Optics

June 2000

President's Message

Well, the new century has rolled in with hardly a whimper and we at University Optics are still doing what we have always done best, bringing you the best in quality telescope parts at reasonable prices. Many of you have been with us for the past 40 years and we truly thank you for your loyalty. While our new catalogue is being printed, please check over this interim price sheet. There have been a number of changes and you will notice we are moving back to the core of our business when we first stated. That is, basic telescope building and helping people get into the hobby at a modest cost.

I have to apologize in that we have had to raise prices on a few of our products. These increases are *strictly* a result of the U.S dollar against the Yen in the last year or so. University has still not caved into the lure of cheap Chinese oculars.

What's New

The following items are **new** for 2000: **A 6mm Abbe Orthoscopic** has been added to our popular orthoscopic lineup. The Internet has spread the story of these remarkable oculars. We are also bringing back the **40mm Konig in 2"** format. Many of you remember this excellent large ocular with a 60 degree field and a reasonable price! We are adding another interesting **2" 52mm Erfle** made by Sky Instruments. In 1-1/4" format , we added a high performance **" short" style 2X** unit with a 27mm clear aperture. Remember, we always carry all of **Willmann-Bell's** new publications although they may not always be listed in our price sheets. Just give us a call.

Discontinued Items

The following items have been discontinued: **Crawford Style Focusers. 80mm Binoculars. 55mm 2" Plossl. 16mm,20mm, 25mm Super Erfle. Binoviewer. 12mm Wide Angle Plossl. Tube Mounting Rings. 2" Prism Star Diagonal. 9mm 12mm & 20mm Kellners.12.5mm Illuminated Plossl.**
