**NEW MICRO MOTION DESIGN —**
a revolutionary Hy-Score innovation that sets new records for sharper, brighter viewing!

**LIFETIME GUARANTEE!***

## CHECK THESE MANY EXCLUSIVE HY-SCORE FEATURES:

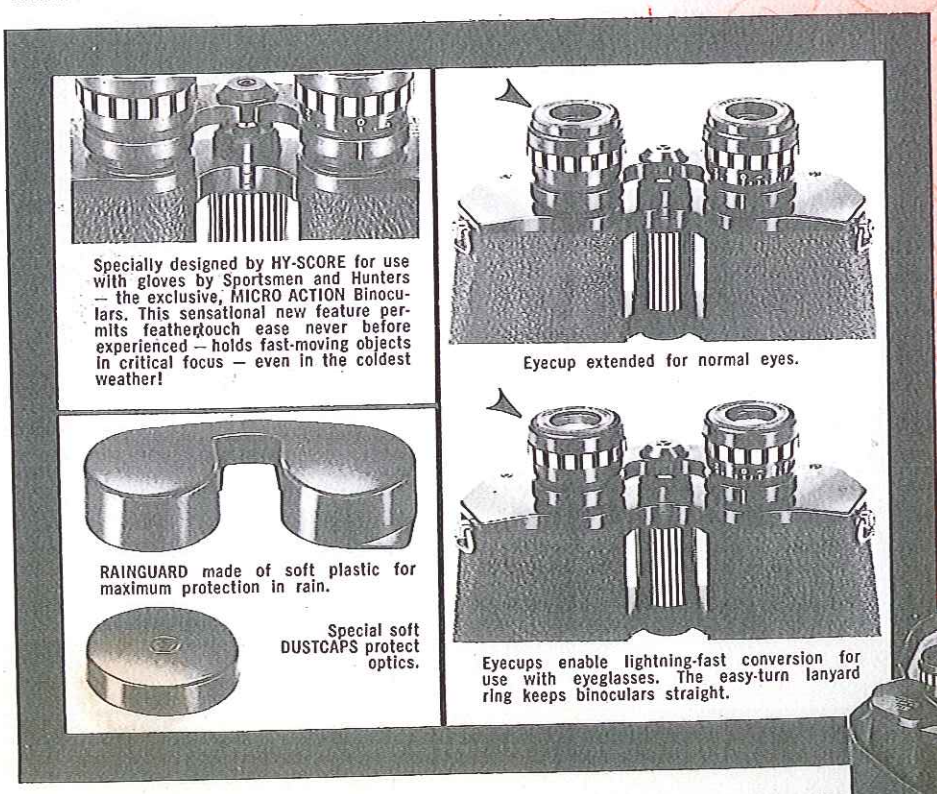

- The miraculous Micro Motion adjustment — the most advanced concept in binocular design. The adjusting wheel is meticulously finished with a diamond tool to obtain a super-high luster finish. Result? An adjustment system that's super-sensitive and easily handled even in cold weather when the user is wearing gloves.
- Computer-calculated optical formula — all possible optical errors are eliminated.
- Retracting eyecups make it simple, convenient for eyeglass wearers to use these fine binoculars to obtain a full field of view — with only a simple twist, (not necessary on models 307 and 309).
- Double coated optical surfaces for clearer image.
- Specially designed HY-SCORE lanyard ring, mounted on turnbuckle, always keeps binoculars straight and in balance.
- Aluminum bodies are tested under one thousand pounds of torturous pressure for porousness to prevent entry of moisture and preserves crystal-clear viewing.
- New, advanced HY-SCORE contour designs fit the hand more perfectly, improve steadiness of grip, make better viewing possible.
- Unique, dull oxidized finish absorbs stray light and reduces internal reflection — means superior viewing.
- A soft plastic rainguard and dustcaps protect the HY-SCORE optics under all conditions.
- Every HY-SCORE binocular endures rigid, exacting inspection through each production step to assure superior clarity.
- Specially designed top grain black pigskin case with soft velvet lining has a deep-cut front for easy removal of binocular — HY-SCORE custom feature.

**6 x 30 SEEFAR MODEL 300**
The first choice when rugged construction and ultra light weight are vital, only 22 oz. Excellent for hunters, hikers, boatsmen, naturalists because of its extra wide 420 ft. field of view at 1,000 yards. With MICRO MOTION center focus. Double coated optics. ## NITROGEN FILLED — FOG RESISTANT

Micro click adjustments assure the shooter of perfect recticle alignments at all times. All 1" models have centered recticle.

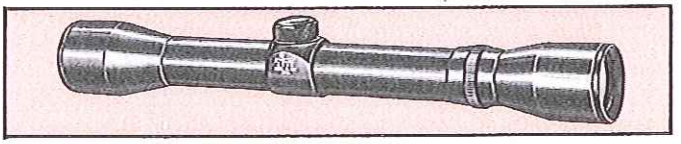

Superior coated optics, computer corrected, offer the shooter a brilliantly sharp image. The hunter can find game faster under diminishing light conditions.

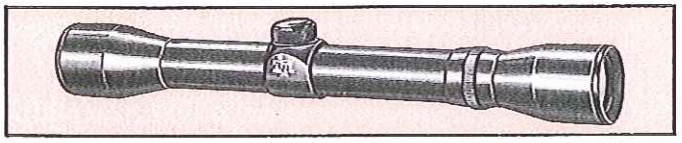

The special design micro-grooved retainer ring holds scope in positive adjustment to fit the individual shooter's needs. No loss of accuracy with a HY-SCORE at a critical moment when that big buck steps out — sight in, adjust — always on target.

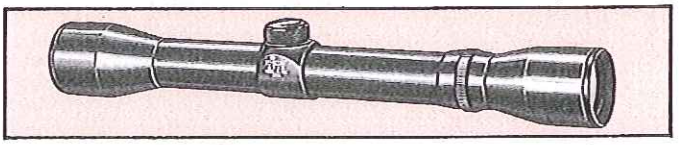

**Model 461 2½x-cross hair-1" Aluminum tube only 19.95**

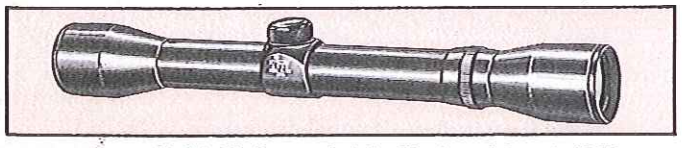

**Model 462 4x-cross hair-1" Aluminum tube only 19.95**

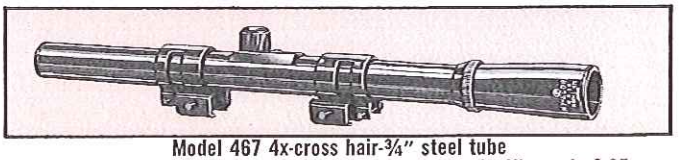

**Model 466 2½x-tapered post-1" Aluminum tube only 19.95**

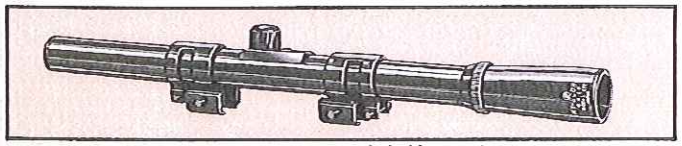

**Model 468 4x-tapered post-1" Aluminum tube only 19.95**

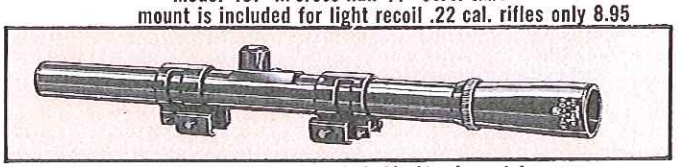

**Model 463 6x-cross hair-1" Aluminum tube only 20.95**

**Model 467 4x-cross hair-¾" steel tube mount is included for light recoil .22 cal. rifles only 8.95**

**Model 469 6x-cross hair-¾" steel tube mount is included for light recoil .22 cal. rifles only 11.95**

**Model 472 4x-cross hair-¾" Aluminum tube mount is included for light recoil .22 cal. rifles only 5.95**

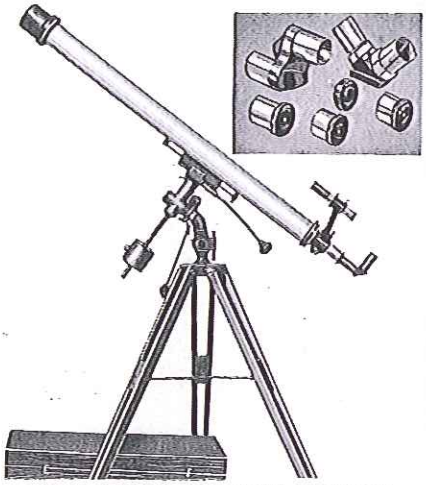

HY-SCORE fixed power scopes are produced in the most advanced optical laboratory. Through careful planning with the critical shooter and advanced hunter in mind HY-SCORE has developed scopes that are optically of the very highest quality! An economical price, too, to be within reach of the average but most demanding sportsman.

**#578** Grey 8½" high
**only 5.00**

## SELECT THE RIGHT BINOCULAR TO FIT YOUR NEEDS . . .

Many binocular models and powers are made. Select the one that suits your own needs best.

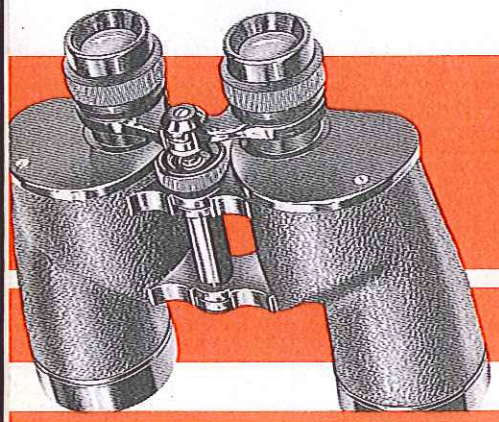

- A. For general use, spectator sports, hunting, bird watching — 6 or 7 power
- B. For travel — 7 or 8 power
- C. For marine use — 7 x 50 power
- D. For mountains and celestial observation — 10 power

*Zoom models except for marine use will fit all above conditions (A, B & D).

Wide angle models are useful when watching moving objects such as running game, spectator sports, flying airplanes and birds. Although they are a little heavier and slightly more expensive, the added visual pleasure is certainly worth the priced differentce.

Zoom models are useful when you want to move in where the action is. Put yourself immediately into a ringside seat and follow the exciting happenings first hand.

As nothing on earth is completely perfect, no binocular fills all needs at all times. The closest binocular ever designed to being versatile under varying condition is the 7 x 35. This model brings the objects viewed seven times closer to you, maintaining a clear image even under varying light conditions. If you want the best in sight, buy HY-SCORE.

## QUALITY . . .
## HY-SCORE BINOCULARS CARRY LIFETIME GUARANTEE . . .

Every part is carefully selected, assembled and inspected in a dust-free optical laboratory under strictest quality controls to assure the consumer the optical fidelity for which HY-SCORE has become famous.

Lens combinations are selected not to vary more than 1% to relieve the slightest pressure on your eye . . . hand polished optical surfaces are coated in a complete vacuum. Hard coating will not rub off under normal use and increases the light transmission as much as 50%, giving crystal clear definition.

Interpupillary eye distance is fully adjustable allowing your HY-SCORE binocular to be used by men, women and children. The only binocular designed with the entire family in mind.

Specially built-in or removable eye cups allow the binocular to be used by people with normal eyesight or eyeglass wearers. It also will serve anyone who is not wearing eyeglasses now but may wear them later in life. Every HY-SCORE binocular is a lifetime investment.

Moving parts have sealed-in lubricants to assure perfect functioning from 0° to 120°F. Wherever you may be traveling a HY-SCORE binocular will give you perfect performance and added enjoyment.

A laboratory test machine vibrating 250 times per minute has proven that the superior construction of the HY-SCORE binocular will maintain its optical fidelity through a lifetime of use.

Your HY-SCORE binocular carries a lifetime guarantee, and under normal use should be able to be passed from generation to generation. Never leave it just lying around, keep it in the carrying case, keep it away from dust and moisture. Every optical instrument requires care. If by accident you should drop it or damage it, factory-trained highly-skilled optical craftsmen at HY-SCORE's nearest service station can restore your binocular to its original performance and condition.
